Delhi 

Accomplished **Technical Architect** with **18+ years of IT experience**, including **10+ years specializing in insurance technology**, delivering enterprise-grade solutions across underwriting, policy administration, integration, and platform modernization. Proven expertise in **solution architecture, technical design, and full-stack engineering**, with a strong focus on **legacy modernization and cloud-enabled Microsoft ecosystems** (.NET Core, C#, Azure, APIs, microservices, event-driven messaging). Skilled in **translating complex business rules into scalable systems**, optimizing underwriting workflows, stabilizing mission-critical platforms, and enabling high-availability enterprise delivery across insurance and adjacent digital products. Skilled in **leveraging AI coding agents (GitHub Copilot, Claude)** to accelerate underwriting workflows, automate rule validation, enhance risk assessment accuracy and migrating legacy solutions to latest tech.

Career Objective: Seeking to leverage deep architectural judgment, practical execution focus, and pragmatic use of AI-assisted engineering to define architecture strategy, technical standards, and solution direction for complex software platforms and enterprise applications.

Experience

AdvantageGo (Sapiens & Coforge)

Technical Architect

Apr 2019 - Present

Underwriting P&C (Insurance Domain)

- Architected and defined end-to-end solutions for property and casualty insurance applications, evaluating risk exposure and ensuring policy compliance with underwriting guidelines.
- Implemented and governed risk assessment models to improve accuracy in premium calculations and enhance portfolio profitability, focusing on scalability and resilience.
- Collaborated with brokers and agents to clarify policy terms and accelerate underwriting decisions, improving client satisfaction through optimized workflows.
- Streamlined documentation processes, reducing underwriting cycle times and increasing operational efficiency through architectural improvements.
- Assessed risk profiles and determined policy terms for property and casualty insurance, optimizing portfolio profitability while ensuring compliance with regulatory standards and defining measurable quality attributes.
- Integrated AI coding agents into underwriting modules to auto-generate risk evaluation scripts, reducing manual coding effort by 40%.
- Applied AI-driven automation for policy rule validation, improving underwriting cycle efficiency and compliance accuracy.

DXC / Xchanging

Professional 2 : Product Developer

Sep 2015 - Mar 2019

Xuber Insurance Software

- Developed and integrated insurance software modules to improve processing accuracy and streamline client policy management workflows,

Skills

Core Architectural

Competencies:

Solution Architecture, Technical Design, API-First Design, Event-Driven Architecture, Cloud-Native Architecture, Domain-Driven Design, Microservices Architecture, Distributed Systems Design, Integration Patterns, Data Modeling, System Design, Reference Architectures, Scalability, Resilience Engineering, Architecture Decision Records (ADRs), Performance Optimization, Maintainability, Interoperability, Observability Strategy, Security Architecture, Cost Optimization, Threat Modeling, Zero-Trust Design, AI-Enabled Architecture, Agentic Capabilities Architecture

Technical Skills:

Languages: C#, HTML, Javascript, Typescript

Databases: SQL, Redis

Tools: Visual Studio, VS Code, SSMS

defining API-first and event-driven patterns where appropriate.

- Monitored system performance and resolved technical issues promptly to maintain high application reliability and uptime, establishing standards for resilience and observability.
- Collaborated with cross-functional teams to align software features with customer requirements, enhancing user satisfaction and engagement through pragmatic solution design.
- Optimized codebase and automated testing procedures to accelerate deployment cycles and increase development team productivity, contributing to maintainability and speed.
- Conducted quality assurance reviews ensuring compliance with industry regulations and minimizing operational risks, incorporating secure design principles.
- Developed and maintained Xuber Insurance Software solutions at DXC / Xchanging, enhancing policy administration efficiency and reducing processing errors through tailored automation and integration, supporting modernization efforts.

GlobalLogic

Associate Consultant

Jun 2011 - Sep 2015

- **Solavei (Social Commerce Platform)**

Spearheaded initial development POCs and structured application logging architecture using Semantic Logging blocks, defining technical standards for observability.

Tech Stack: C#, ASP.NET 4.0, Web API, MVC4, jQuery, Umbraco CM

- **FlightGlobal (Aviation Domain)**

Implemented premium content delivery pipelines and personalized workflows using Episerver CMS, defining architecture for data flows and user-facing applications.

Developed secure, dedicated landing layers and data spaces for registered and premium-tier clients, incorporating security and privacy standards.

- **RateGain (Travel Domain)**

Designed and engineered critical service modules integrated with automated, bot-based client applications, guiding architecture for AI-enabled capabilities. Constructed modular Views, Controllers, and Models aligned with iterative product releases, promoting maintainability and clear system design.

Daffodil Software

Sr. Software Engineer

Jan 2007 - Jun 2011

- Customization AspDotNetStorefront, focusing on customer preferences and product catalog.

Learning & Certifications

Coursera

- Google AI Fundamentals (In Progress)

LinkedIn Learning

- Anthropic Claude Certified Architect Foundations (CCAR-F) Cert Prep (In Progress)

Anthropic

- AI Fluency: Framework & Foundations
- Claude Code in Action

AI Tools: Github Copilot, Claude

Cloud Platforms: Azure

Framework: Angular, .NET Core, .NET Framework 4.7, .NET Standard 2.0

Architecture Skills:

Solution Architecture, Technical Design Docs, Full-Stack Engineering, Legacy Modernization, Workflow Optimization

Interpersonal Skills:

Technical Leadership & Mentorship, Cross-functional Communication (Technical & Non-Technical Audiences), Global Team Collaboration, Stakeholder Management, Strategic Alignment, Mentoring team members
